A job well done.

Pontefract General Infirmary

Sector: Healthcare
Project: **Pontefract
General
Infirmary**
Client: Balfour Beatty Construction
Value: £8,300,000
Location: Pontefract, West Yorkshire
Status: Complete

Work Carried out:

- Bulk excavation
- Sub-structure foundations
- New drainage systems, including attenuation
- Service diversions
- In-situ superstructure concrete
- External works

Project Description

The works consisted of bulk excavation of 32,000m³ of inert material, installation of pad foundations, drainage networks including attenuation system, in-situ concrete structures; including energy centre and the construction of new car parks and hard landscaped areas to form the new £80 Million Pontefract Hospital in West Yorkshire.

In-situ concrete structures including energy centre and the construction of new car parks and hard landscaped areas to form the new £80 Million Pontefract Hospital in West Yorkshire.
